## Martin OM-28E vs. OM-28: Which One Should You Choose?

Comparison of the OM-28E to the non-electric OM-28 model The [Martin OM-28E](#) and non-electric OM-28 models are both exceptional guitars that offer exceptional sound quality and playability. When choosing between the two models, it's important to consider your individual playing needs and preferences.

One of the biggest differences between the two models is the OM-28E's Fishman Aura VT Enhance electronics system. While this system provides exceptional sound quality and versatility, it also adds to the guitar's overall weight and complexity. If you don't plan on using the guitar in amplified situations, the non-electric OM-28 may be a better choice.

Another key difference between the two models is the neck profile. The OM-28E features a modified low oval neck profile, which some players may find more comfortable than the standard OM-28 neck profile. However, this is largely a matter of personal preference, and both neck profiles are designed for maximum playability and comfort.

**Differences in sound, playability, and price** When it comes to sound and playability, the OM-28E and non-electric OM-28 are very similar. Both guitars feature a solid Sitka spruce top and solid East Indian rosewood back and sides, providing a warm and balanced tone that is well-suited for a wide range of playing styles.

In terms of price, the OM-28E is typically more expensive than the non-electric OM-28 model, due in part to its high-performance electronics system. However, the OM-28E's added versatility and ease of use may make it worth the additional cost for some players.

**Factors to consider when choosing between the two models** When choosing between the Martin OM-28E and non-electric OM-28 models, there are a few key factors to consider. First, consider whether you plan on using the guitar in amplified situations, as the OM-28E's Fishman Aura VT Enhance electronics system may be a key factor in your decision.

Next, consider your individual playing needs and preferences. If you prefer a modified low oval neck profile, the OM-28E may be a better choice. However, if you prefer a more traditional neck profile, the non-electric OM-28 may be a better fit.

Finally, consider your budget. The OM-28E is typically more expensive than the non-electric OM-28 model, so if cost is a key factor in your decision, the non-electric OM-28 may be the better choice.
